

Deep Cleaning Cat Cages

The companion sheet to our video tutorial

You'll Need:

- Gloves
- Clean rags and paper towels
- A 30-gallon rolling garbage can
- Receptacle for soiled, reusable items
- Accelerated H₂O₂, diluted 4 oz. per gallon
- Clean food and water bowls
- Clean bedding
- Clean toys

Remember, it's important to minimize stress for other cats by keeping noise to a minimum.

1. Dispose of the litter box and kennel floor liner
2. Apply accelerated H₂O₂ and spread into crevices and corners
3. Let the solution stand for 5 minutes
4. Wipe down kennel with a clean rag, allow to air dry
5. Replace kennel floor liner and clean litterbox
6. Add clean toys, food and water bowls. Leave bowls upside-down to signal sanitation
