

TOP WAYS TO MINIMIZE DISEASE TRANSMISSION WHILE CLEANING

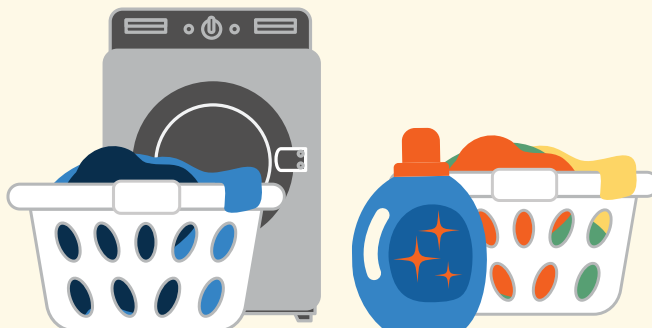

1

Enclosure banks should be distanced to prevent aerosol transmission.

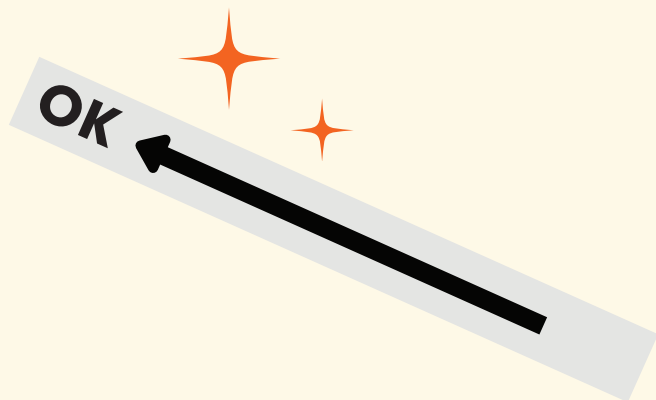

4

Wash kennel laundry (with bleach) separately from surgical laundry.

2

Ensure the sterility of packs by using sterilization indicator strips.

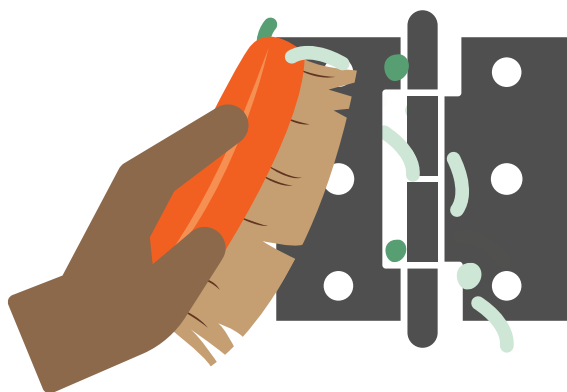

5

Remove organic material before using disinfectant.

3

When cleaning enclosures, be sure to scrub doors and hinges.

6

Regularly clean and dry and scrub, solution, tattoo ink, and eye lube containers.
