USING TEETH TO AGE KITTENS

A kitten's permanent incisors (the 12 teeth in the front of the mouth – 6 on top, 6 on bottom) usually come in at a predictable rate. The following pictures can be used as a guideline for determining the age of kittens between **12 and 24 weeks of age.**

<12 weeks

12 weeks

14 weeks

16 weeks

18 weeks
