

## How to Make a Fake Cat (and Get a Real One Adopted)

### First Step

Take a high-quality photo of the cat (a good cell phone image is fine) and print. MSPCA recommends a large-format printer capable of printing a 13x19 image. Ask your supporters for help if you're short on funds.

### Second Step

Carefully cut around the image to remove background. MSPCA uses double-sided matte paper for printing – it's slightly thicker than normal paper, allowing the image to stand upright once cut out.

### Third Step

Attach cutout to a sturdy object. MSPCA tapes the image to a simple plastic brochure holder – or even a cardboard box. Use something that is vertical in orientation, and narrower than the image so it remains hidden.

### Fourth Step

Place in empty kennel along with the cage card you use for other cats. (MSPCA keeps four to six cut-out cats around the shelter at any given time to avoid overdoing it!)
