

Spot Cleaning For Cat Kennels

[The Companion Sheet to our Video Tutorial](#)

You'll Need:

- Gloves
- A rag or paper towel
- Spray bottle labeled Accelerated H2O2 (2oz/gal)
- Fresh litter
- A 30-gallon rolling garbage can
- Fresh drinking water

Remember, it's important to avoid removing the cat's scent from her space when cleaning. Don't use chemical cleaners, and only replace soiled toys and bedding.

1. Use a new pair of gloves or wash your hands with soap and water for each kennel
2. Coax the resident cat to an empty portal or shelf
3. Remove bowls and litter pan
4. Use cleaning solution and paper towel or rag to wipe any smudges
5. Refresh drinking water and replace litter
