

- Your pet has been administered and/or prescribed an antibiotic to help prevent or treat an infection of his/her surgical site.
 - Please follow all label directions and give the medication with a meal.
 - Possible side effects include vomiting, diarrhea, anorexia or general gastrointestinal upset.
 - If you see any of these side effects, stop giving the medication and contact us at **(855) 434-9285**. This help line is open 24 hours.
