

- Your dog has been prescribed Gabapentin to reduce pain & anxiety, & provide mild sedation.
 - The sedation can help restrict activity to aid in healing after surgery.
 - Please follow all label directions for administering medication.
 - If your pet is too sedate or has any vomiting or diarrhea on this medication, stop giving the medication & contact us at **(855) 434-9285**. This helpline is open 24 hours.
