

- Your pet has been prescribed Trazodone, a mild sedative to help keep him/her calm. Please follow all label directions.
 - Do not give this medication if your pet is already on medication to reduce fear or anxiety.
 - Possible side effects include anxiousness, vomiting, diarrhea, seizures, hypertension and/or cardiac arrhythmia.
 - If you see any of these side effects, stop giving the medication and contact us at **855-434-9285**. This helpline is open 24 hours.
