

# Avoid pet emergencies!

## Household Dangers Checklists

### Avoid pet emergencies!

Get familiar with the toxins throughout your home and outdoor spaces and make them inaccessible to your animals.

Use the checklists as a reminder to keep your four-legged friends safe:

- **Kitchen**
- **Bedroom**
- **Bathroom**
- **Living Area**
- **Basement**
- **Garage**
- **Barn, Patio, and Yard/Garden**

# Household Dangers Checklist: **Toxins in the Kitchen**

## Did You Know?

When your dog eats raw bread dough the dough expands in the stomach and releases alcohol and gas, causing drunkenness and life threatening signs such as bloat.

**Note:** *Get familiar with the toxins in every part of your home and make them inaccessible to your pets. Visit [aspcapro.org/poison](http://aspcapro.org/poison) for more information.*

## Do You Need To Seek Treatment?

If you think your pet may have eaten a potentially poisonous substance, call your veterinarian immediately or call:

**Animal Poison  
Control Center**

**888-426-4435**

Call for expert toxicology advice.  
A consultation fee may apply.
